Thanks Shari.

Will put 1/15/21 down as the due date but can revisit that when you dig into the review.

Yes, let's check in mid/late December to evaluate the LOE.

Kate

Thank you Kate

We were expecting this, and Calvin and I had preliminarily set 1/15/21 as the due date for this. So, let's aim for that. I will check in with Jim Walker and let you know if he needs more time for the construction/plugging part.

I am a little concerned that the LOE may be too low. Can we reassess that later this month (as we proceed on all of the reviews)?

I'll request a kickoff call if Jim needs one, but I agree that it doesn't seem necessary.

Hi Shari.

Below is a new CES tech support request – I think you were expecting this. Please let me know if you have any questions.

Calvin said that you can forgo the kick-off call if you don't have any clarifying questions.

Please let me know the deliverable due date once you review the TDM.

Thanks. Kate

Contract No. EP-C-15-022, Workplan Assignment No. 5-90
R9 Tech Support for Implementation of the UIC Program – Clean Energy Systems - Class VI UIC Permit Application # R9UIC-CA6-FY20-1 [Task 1; Subtask 1.2 – Technical Review Analysis]

Technical Direction

Background: On October 28, 2020, EPA provided CES with technical evaluation comments on the proposed testing and monitoring activities; and the proposed construction plugging procedures submitted as part of the permit application. On December 4, 2020, CES provided responses to EPA's comments.

Action: Under Task 1, SubTask 1.2, review and provide an evaluation of the CES's responses. If the responses do not provide sufficient information, please provide evaluation and discussion under this technical review TDM.

Deliverable: Provide a technical analysis report evaluating CES's responses to EPA technical comments. The report should include an itemized list of additional information necessary to clarify, modify, or supplement the permit application material. Deliverable should be emailed in WORD to Kate Rao and Calvin Ho.

Estimated LOE: 40 hours

Schedule: 4 - 6 weeks from the Kick-off call/confirmation of TDM.

Kick-off Call: Not needed unless Cadmus has questions about this TDM.

Material to Review:

- CES's 12/4 Responses to EPA Technical Review Comments (see attached)
